

## SCHOOL DESIGNATED “TOP PROJECTS”

**\*\* NOTE \*\*** Those schools submitting both juvenile and junior projects should use two of these forms.

### DIRECTIONS:

In line with the details stated in the Rules and Regulations, school officials are requested to identify the best projects for which applications are being submitted to the NRSEF.

**N.B. All projects that appear on the Top Project Form must complete the online registration process by the posted deadline.**

Please list your school’s top ten project titles and students’ names on this page and enclose this page with the refundable \$50 school application fee and all participant signature forms to the NRSEF. The first two projects on your list, which meet the criteria of the Rules and Regs, will be automatically accepted for participation into the FAIR.

Please note that IT IS THE RESPONSIBILITY OF THE SCHOOL OFFICIALS TO SELECT THEIR BEST TWO PROJECTS and rank the remaining projects. The NRSEF Rules and Regulations committee will make selections in the case where school officials do not complete and submit this form. If space permits and projects pass the screening process, more projects may be accepted. **Only projects accepted and notified by the FAIR will be eligible to participate.**

Please send the following:

- i) Completed Top Projects Form
- ii) Signed Permission Forms for all projects/participants (from the online registration)
- iii) \$ 50 refundable school application fee (payable to Niagara Regional Science and Engineering Fair)

To:

**NCDSB** schools to Dino Petruzzi at Denis Morris Catholic High School

**DSBN** schools to Sean Hanna at the Don Reilly Resource Centre
